

2-- AUTHORIZED ACCESS POINT BLOCK

Definition and Scope of Fields

The access point for which the record is made.

Occurrence

An authority record must contain one field from the 2-- block.

The 2-- fields may be repeated for versions of the 2-- authorized access point in different scripts. If, however, the alternative script form links to a separate record that contains the alternative form as the 2-- authorized access point with appropriate variant and related access points and notes in that script, then the alternative script form should be carried in a 7-- authorized access point in other language and/or script field.
