Notes on Field Contents

In fields 500, 510, 520, and 241 the code in the subfield $4 used to designate the relationship between the person, corporate body, or family named in the field and the work or expression to which the record refers. In fields 500, 510, and 520, subfield $4 should be used only when subfield $5 character position 4 is set to value "a" (creator). Compare $5/4 Relationship Code Between Agents and a Work or an Expression. The relator codes can be either numerical or alphabetical. The list of numerical codes is to be found in the UNIMARC/Bibliographic format, Appendix B. If greater precision in 500 is required for performers, the alphabetical codes that have been designed for field 146 (UNIMARC/Bibliographic format) can be used in subfield $4. The list of codes values is found in the IAML web site http://www.iaml.info/activities/cataloguing/unimarc/medium. An agency requiring greater precision should use the numeric code followed by the more specific alphabetic code in a repeated subfield.
