

600 SUBJECT ACCESS POINT – PERSONAL NAME

Field Definition and Scope

Name of a person who is one of the subjects of the work, in access point form, with the optional addition of extra subject information.

The access point is structured in the same form as the access points for persons responsible for the content of a work or an expression and recorded in fields 50-. Subfields \$a, \$b, \$c, \$d, \$f, \$g and \$p follow the same form as in field 50- and further explanation of the scope and content of these subfields can be found there.

In the field 600 terms may be added to a subject access point to further specify it with respect to form, topic, place or time. These and the order of all the subfields follow the rules of the subject system or thesaurus used by the agency preparing the record.

Indicators

Indicator	Value	Description
1	#	blank (not defined)
2		Form of Name Indicator
	0	Name entered under forename or in direct order
	1	Name entered under surname (family name, patronymic etc.)

Indicators Description

Indicator 2: Form of Name Indicator

This indicator specifies whether the name is entered under the first occurring name (forename) or a name in direct order or whether it is entered under a surname, family name, patronymic or equivalent, usually with inversion.

Subfields Description

\$a Entry Element

The portion of the name used as the entry element in the access point; that part of the name by which the name is entered in ordered lists.

This subfield must be present if the field is present. Not repeatable.

\$b Part of Name Other than Entry Element

The remainder of the name, used when the entry element is a surname or family name. It contains forenames and other given names.

The form of name indicator should be set to 1 when this subfield is used. Not repeatable.

\$c Additions to Name Other than Dates

Any additions to names (other than dates) which do not form an integral part of the name itself including titles, epithets or indications of office.

Repeatable for second and subsequent occurrences of such additions.

\$d Roman Numerals

Roman numerals associated with names of certain popes, royalty and ecclesiastics. If an epithet (or a further forename) is associated with the numeration, this too should be included.

The form of name indicator should be set to 0 when this subfield is used. Not repeatable.

\$f Dates

The dates attached to personal names together with abbreviations or other indications of the nature of the dates. Any indications of the type of date (e.g., flourished, born, died) should also be entered in the subfield in full or abbreviated form. All the dates for the person named in the field should be entered in \$f. Not repeatable.

\$g Expansion of Initials of Forename

The full form of forenames when initials are recorded in subfield \$b as the preferred form and when both initials and the full form are required. Not repeatable.

\$p Affiliation/Address

This subfield contains the institutional affiliation of the individual at the time the work was prepared. Not repeatable.

\$j Form Subdivision

A term added to the subject access point to further specify the kind(s) or genre(s) of material. Agencies not using this subdivision should use \$x instead. Repeatable.

\$x Topical Subdivision

A term added to a subject access point to further specify the topic that the subject access point represents. Repeatable.

\$y Geographical Subdivision

A term added to a subject access point to specify a place in relation to a person which the subject access point represents. Repeatable.

\$z Chronological Subdivision

A term added to a subject access point to specify the period in time in relation to a person whom the subject access point represents. Repeatable.

\$2 Source

Identification in coded form of the system from which the subject access point is derived.

It is recommended that subfield \$2 always be present in each occurrence of the field. For a list of system codes, see UNIMARC/Bibliographic format, Appendix A. Not repeatable.

See also specification of [Control Subfield 2](#).

\$3 Authority Record Identifier or Standard Number

The control number for the authority record for the person for which a subject access point is established in the record for a work. Repeatable when it is necessary for more than one authority record number to indicate each part of an access point where the indexing system uses a pre-coordinate syntax.

See also specification of [Control Subfield 3](#).

\$R Real World Object URI

See specification of [Control Subfield 3](#). Repeatable.
