2	#	blank (not defined)

Indicators Description

Indicator 1: Type of Provenance Information

Specifies the particular element of the numismatic resource that is described in this field.

Value 0: Archaeological provenance

Used for ancient artefacts (e.g. numismatic resources, ceramics, etc.) to provide information on where the item was found and the circumstances of its discovery. EX 14, 15.

Subfields Description

$a Text of Note

Not repeatable.

$u Uniform Resource Identifier (URI)

A Uniform Resource Identifier (URI), such as a URL (Uniform Resource Locator) or URN (Uniform Resource Name), serves as a standardized string that identifies a resource and provides electronic access via internet protocols. This allows for automated retrieval or interaction with the resource in a consistent manner.

Subfield $u may be used when an electronic version of the image of a page(s) relevant to the provenance information is available (i.e., a digitized extract of the item described in the record, part of an electronic resource). Repeatable.

$5 Institution to which the Field Applies

Name of the institution to which field applies in the coded form if it is considered necessary by the agency which creates the record to identify specific attributes of an item.

If the subfield is used codes should be entered in accordance with the provisions of International Standard Identifier for Libraries and Related Organizations (ISIL), ISO 15511 or may contain codes from MARC Code List for Organizations, otherwise, the full name of the agency or a national code may be used.

If the institution holds more than one copy the shelfmark of the item should be added after a colon. Not repeatable.

$6 Interfield Linking Data

This subfield contains information allowing the field to be linked for processing purposes to other fields in the record. (See section 3.13 Interfield Linking Data, 3 Format structure).

The instructions for the use of this subfield form the first part of Section 3.13. $6/0 Linking explanation code will always have the value "b" = Link associated with a item, unless an alternative graphic representation or script is involved.

$8 Materials Specified

Part of the described materials to which the field applies. Not repeatable.

Notes on Field Contents

It is expected that the record is made for the ideal copy. However, in this note field provenance of the item is described in the form in which it appears in the book, e.g. book-plates, author's and/or owner's autographs, seals, etc. Code of the institution to which the Provenance Note field applies is recorded in $5.

The field may be used to record custodial history of archival resources – information on transfers of ownership, responsibility and/or custody of the unit of description or its part. If the archival history is unknown, this fact may also be recorded in the field.

Related Fields

316 NOTES RELATING TO THE ITEM	This field contains a note relating to characteristics of the item, as for example, wanting leaves, copy characteristics, binding, numbered copies of an edition, etc.
856 ELECTRONIC LOCATION AND ACCESS	This field applies to the whole resource described in the record and/or reference files related to the described resource such as thumbnails and content pages. It cannot be used to provide electronic access to any other part of the resource described in the record.
