7 EXPLANATORY NOTES

Throughout the text of this manual, the following conventions have been used.

1) The dollar sign ($) has been used in place of the ISO character IS2 (of ISO 646) as the first character of a subfield identifier.

2) The character # has been used in the examples to indicate a blank.

3) In the examples the field separator character is assumed and is not shown explicitly.

4) The phrase "not defined" associated with an indicator position means that no values have been given to that indicator position.

5) Externally maintained code lists are needed in some subfields. These code lists are in the appendixes of the UNIMARC/Bibliographic format.

6) The character <AR_ID> in $3 has been used in the examples to indicate non-existent authority record identifier.
